

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester 13, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92037, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW12DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price of a volume (which includes postage) is £16.00 net (US \$52.00 in the U.S.A. and Canada). Single parts cost £7.00 net (US \$21.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 9

PART 1 FEBRUARY 1973

Experimental study of force-free, collinear plasma structures. E. E. NOLTING, P. E. JINDRA and D. R. WELLS	page 1
Ordinary-mode electromagnetic instability for counter-streaming ions with anisotropic temperatures. J. D. GAFFEY, W. B. THOMPSON and C. S. LIU	17
Nonlinear interaction between ordinary electromagnetic modes. S. KRISHAN, D. RANKIN and A. A. SELIM	23
Absorption and transformation of electrostatic surface waves in the transition layer of a magneto-active plasma. V. V. DEMCHENKO and K. E. ZAYED	33
Comments on the reconnexion rate of magnetic fields. E. N. PARKER	49
Electrical conductivity from electric arc measurements. R. S. DEVOTO and D. MUKHERJEE	65
The relative intensities of nitrogen lines in the semi-coronal regime. W. A. CILLIERS, J. D. HEY and J. P. S. RASH	77
Dispersion curves for the generalized Bernstein modes. S. PURI, F. LEUTERER and M. TUTTER	89
Thermodynamic bounds on the magnetic fluctuation energy in unstable anisotropic plasmas. R. C. DAVIDSON and S. T. TSAI	101
Some properties of large-amplitude electrostatic waves (Allis modes). W. W. NEEL and R. W. FLYNN	117
Electric field fluctuations in turbulent plasmas. I. COOK and J. B. TAYLOR	131

PART 2 APRIL 1973

A unified picture of the parallel whistler mode instability. R. W. LANDAU and S. CUPERMAN	143
Observation of 'switch-on' shocks in a magnetized plasma. A. D. CRAIG and J. W. M. PAUL	161
Comparison of electron and electronic temperatures in recombining nozzle flow of ionized nitrogen-hydrogen mixture. Part 1. Theory. C. PARK	187
Comparison of electron and electronic temperatures in recombining nozzle flow of ionized nitrogen-hydrogen mixture. Part 2. Experiment. C. PARK	217

Linearized theory of inhomogeneous multiple 'water bag' plasmas. H. W. BLOOMBERG and H. L. BERK	page 235
Stability of a vortex sheet between collisionless plasmas. R. RAJARAM, G. L. KALRA and J. N. TANDON	249
Plasma fluid equations in the high collision-frequency limit. J. M. GREENE	261
Wavenumber space analysis of oscillations in weakly non-uniform magnetoplasmas. J. H. BROWNELL	275

PART 3 JUNE 1973

Nonlinear development and Fourier analysis of the whistler mode instability. S. CUPERMAN and Y. SALU	295
Shielding of moving test particles in warm isotropic plasma. L. CHEN, A. B. LANGDON and M. A. LIEBERMAN	311
Magnetogasdynamic shock polar: exact solution in aligned fields. L. A. BERTRAM	325
Wave propagation in a partially-ionized chemically reacting plasma. T-M. FANG and H. R. BAUM	349
Heterogeneous electron behaviour in a turbulent plasma jet. A. DEMETRI- ADES and E. L. DOUGHMAN	367
A modified Kortweg-de Vries equation for ion-acoustic waves due to resonant electrons. H. SCHAMEL	377
Instabilities of magnetosonic waves due to the magnetic drift resonance. T. ISHIHARA	389
On the re-connexion of magnetic lines of force. S. FUKAO and T. TSUDA	409
Characteristics of the fast and slow magnetosonic waves in layer plasmas. T. TAMAO	429
Nonlinear propagation of electromagnetic waves in a plasma containing random irregularities. C. H. LIU	443
INDEX TO VOLUME 9	453
